

HAGER MOSTAFA

Frontend Developer | Angular Specialist

✉ ho2333535@gmail.com ☎ 01124224914 📍 Maadi, Cairo, Egypt

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building scalable web applications using Angular 19, TypeScript, and modern JavaScript frameworks. Proven ability to implement complex features including state management with signals, responsive UI design, and RESTful API integration. Completed intensive training at Route Academy and currently seeking opportunities to contribute to production-level applications.

PROFESSIONAL EXPERIENCE

ECIT, Frontend Developer Intern

2024 | Focus: Angular Development

- Developed responsive web components using Angular Material and PrimeNG component libraries
- Implemented form validation and user authentication flows using Angular Reactive Forms
- Collaborated with team members using Git for version control and code reviews
- Participated in daily standups and sprint planning sessions following Agile methodology

EDUCATION

Al-Azhar University, Faculty of Science,

2020

Bachelor of Science

Graduated: 2020 | Grade: Very Good

SOFT SKILLS

Problem Solving & Analytical Thinking, Time Management & Prioritization, Adaptability & Quick Learning, Effective Communication, Attention to Detail, Team Collaboration

LANGUAGES

English

Professional Working Proficiency

Arabic

Native

KEY PROJECTS

E-Commerce Platform, Tech Stack: Angular 19, RxJS, Angular Material, TypeScript

- Built full-featured e-commerce application with product catalog, shopping cart, and checkout flow
- Implemented JWT-based authentication system with role-based access control
- Developed product filtering, sorting, and search functionality with real-time updates
- Created shopping cart and wishlist features with persistent state management
- Optimized performance using lazy loading and OnPush change detection strategy

Enterprise State Management Demo, Tech Stack: Angular 19, RxJS, CSS, TypeScript

- Architected full-stack application using Angular Signals, RxJS, and Supabase with real-time database synchronization
- Implemented multi-organization system with role-based access control (RBAC) and secure authentication
- Demonstrated advanced TypeScript, Observable chaining, and component lifecycle management
- Already included: Angular, Supabase, RxJS, TypeScript, PostgreSQL, Real-time, Authentication, State Management
- Resolved production issues: subscription memory leaks using takeUntil pattern, state inconsistencies through Signal consolidation

Purchase Invoice Management System,

Tech Stack: Angular 19, Angular Material, Reactive Forms, TypeScript

- Designed responsive invoice creation system with automated calculations
- Implemented smart supplier selection with auto-populated contact and banking information
- Built dynamic item table with real-time quantity x unit price calculations
- Prepared RESTful API integration architecture for backend connectivity

Task Management Application, Tech Stack: Angular 19, RxJS, Angular Material, Chart.js

- Architected modular application using Standalone Components and Clean Architecture principles
- Built lazy-loaded feature modules (Users, Dashboard, Notifications) for optimal performance
- Integrated real-time data visualization with Chart.js and WebSockets simulation

CERTIFICATIONS & TRAINING

- Advanced JavaScript & Frontend Development - Jonas Schmedtmann (Udemy)
- Angular Frontend Development Track - Route Academy (2024)
- Self-directed learning: Advanced Angular patterns, NgRx state management, RxJS operators
